### **Building Regulations England Part L (BREL) Compliance Report**

Approved Document L1 2021 Edition, England assessed by Array SAP 10 program, Array

Date: Tue 18 Jun 2024 14:07:30

Project Information			
Assessed By	Sean Hunter	Building Type	House, Semi-detached
OCDEA Registration	EES/026592	Assessment Date	2024-06-18

Dwelling Details			
Assessment Type	As designed	Total Floor Area	66 m <sup>2</sup>
Site Reference	4907-YO71-6328-1113	Plot Reference	1113
Address			

Client Details	
Name	Vistry Southern
Company	Vistry
Address	Central 40, Chineham Park, Basingstoke, RG24 8GU

This report covers items included within the SAP calculations. It is not a complete report of regulations compliance.

1a Target emission rate and dwelling emission rate					
Fuel for main heating system	Mains gas				
Target carbon dioxide emission rate	12.68 kgCO <sub>2</sub> /m <sup>2</sup>				
Dwelling carbon dioxide emission rate	10.92 kgCO <sub>2</sub> /m <sup>2</sup>	OK			
1b Target primary energy rate and dwelling primary energy	ЗУ				
Target primary energy	66.38 kWh <sub>PE</sub> /m <sup>2</sup>				
Dwelling primary energy	58.27 kWh <sub>PE</sub> /m <sup>2</sup>	OK			
1c Target fabric energy efficiency and dwelling fabric energy efficiency					
Target fabric energy efficiency	36.7 kWh/m <sup>2</sup>				
Dwelling fabric energy efficiency	33.6 kWh/m <sup>2</sup>	OK

This document is a Predicted Energy Assessment for properties marketed when they are incomplete. It includes a predicted energy rating which might not represent the final energy rating of the property on completion. Once the property is completed, this rating will be updated and an official Energy Performance Certificate will be created for the property. This will include more detailed information about the energy performance of the completed property.

The energy performance has been assessed using the Government approved SAP 10 methodology and is rated in terms of the energy use per square meter of floor area; the energy efficiency is based on fuel costs and the environmental impact is based on carbon dioxide (CO2) emissions.

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be. The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating the less impact it has on the environment.
