### **Building Regulations England Part L (BREL) Compliance Report**

Approved Document L1 2021 Edition, England assessed by Array SAP 10 program, Array

Date: Tue 18 Jun 2024 14:06:58

| Project Information |             |                 |                    |
|---------------------|-------------|-----------------|--------------------|
| Assessed By         | Sean Hunter | Building Type   | House, End-terrace |
| OCDEA Registration  | EES/026592  | Assessment Date | 2024-06-18         |

| <b>Dwelling Details</b> |                     |                  |                   |
|-------------------------|---------------------|------------------|-------------------|
| Assessment Type         | As designed         | Total Floor Area | 80 m <sup>2</sup> |
| Site Reference          | 4907-YO71-6328-1066 | Plot Reference   | 1066              |
| Address                 | Plot 3 Bed          | •                | •                 |

| Client Details |  |  |
|----------------|--|--|
| Name           | Vistry Southern                                  |  |
| Company        | Vistry   |  |
| Address        | Central 40, Chineham Park, Basingstoke, RG24 8GU |  |

This report covers items included within the SAP calculations. It is not a complete report of regulations compliance.

| 1a Target emission rate and dwelling emission                            | rate                                    |    |  |
|--|---|----|--|
| Fuel for main heating system   | Mains gas                               |    |  |
| Target carbon dioxide emission rate                                      | 11.44 kgCO <sub>2</sub> /m <sup>2</sup> |    |  |
| Dwelling carbon dioxide emission rate                                    | 10.32 kgCO <sub>2</sub> /m <sup>2</sup> | OK |  |
| 1b Target primary energy rate and dwelling primary energy                |   |    |  |
| Target primary energy  | 59.8 kWh <sub>PE</sub> /m <sup>2</sup>  |    |  |
| Dwelling primary energy  | 55.48 kWh <sub>PE</sub> /m <sup>2</sup> | ОК |  |
| 1c Target fabric energy efficiency and dwelling fabric energy efficiency |   |    |  |
| Target fabric energy efficiency  | 35.3 kWh/m <sup>2</sup>                 |    |  |
| Dwelling fabric energy efficiency  | 32.3 kWh/m <sup>2</sup>                 | OK |  |

| 2a Fabric U-values |   |   |   |     |
|--------------------|---|---|---|-----|
| Element            | Maximum permitted average U-Value [W/m²K] | Dwelling average U-Value [W/m <sup>2</sup> K] | Element with highest individual U-Value |     |
| External walls     | 0.26                                      | 0.22  | Walls (1) (0.22)                        | OK  |
| Party walls        | 0.2                                       | 0   | Party Wall (1) (0)                      | N/A |

### Predicted Energy Assessment

Plot, 3 Bed

Dwelling type:
Date of assessment:
Produced by:
Total floor area:
DRRN:

House, End-Terrace 18/06/2024 Sean Hunter 80.36 m<sup>2</sup>

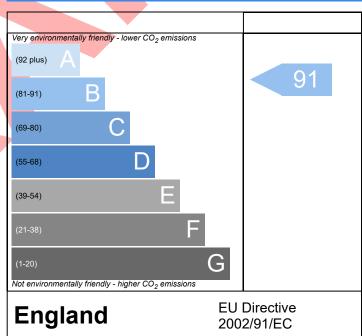

This document is a Predicted Energy Assessment for properties marketed when they are incomplete. It includes a predicted energy rating which might not represent the final energy rating of the property on completion. Once the property is completed, this rating will be updated and an official Energy Performance Certificate will be created for the property. This will include more detailed information about the energy performance of the completed property.

The energy performance has been assessed using the Government approved SAP 10 methodology and is rated in terms of the energy use per square meter of floor area; the energy efficiency is based on fuel costs and the environmental impact is based on carbon dioxide (CO2) emissions.

# Energy Efficiency Rating Very energy efficient - lower running costs (92 plus) A (81-91) B (69-80) C (55-68) D (21-38) F (1-20) G Not energy efficient - higher running costs Eu Directive 2002/91/EC

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

### Environmental Impact (CO<sub>2</sub>) Rating

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.
